FINAL TOPLINE
March 15-28, 2021
N=3,375**

Notes: All numbers are percentages unless otherwise noted. Percentages greater than zero but less than 0.5% are replaced by an asterisk (*). Rows/columns may not total to 100% due to rounding. Foreign born excludes those born in Puerto Rico, unless otherwise noted.

Before 2019, all surveys of Hispanics by Pew Research Center were conducted by telephone. Phone trends that are comparable to those from surveys of Hispanics conducted online based on findings from a [mode effect study](#) are labeled as 'trend for comparison.' In these cases, readers can directly compare phone and online results over time. Phone trends that may not be comparable to online trends due to the change in survey mode or the lack of results from the mode effect study are labeled as 'trend for reference.' In these cases, trends from phone and online surveys are not comparable.

³³ Language dominance is a composite measure based on self-described assessments of speaking and reading abilities. "Spanish-dominant" persons are more proficient in Spanish than in English, i.e., they speak and read Spanish "very well" or "pretty well" but rate their ability to speak and read English lower. "Bilingual" refers to persons who are proficient in both English and Spanish. "English-dominant" persons are more proficient in English than in Spanish.
